

SIRISHA BOYA

React.js | .NET Full Stack Developer | Microservices | Azure | REST APIs | SQL Server

Hyderabad, Telangana | +91-9398268492 | sirishab9196@gmail.com

Professional Summary

React/.NET Full Stack Developer with 4+ years of experience designing, developing, deploying and supporting enterprise applications across Banking, Healthcare, HRMS, Procurement and Asset Management domains. Experienced in end-to-end feature ownership using React.js, ASP.NET Core, C#, SQL Server, PostgreSQL, Microservices, Docker and Microsoft Azure. Strong background in API design, authentication, cloud deployments, production support, mentoring junior developers and collaborating with cross-functional teams. Experienced in AI-assisted software development using modern LLM tools to accelerate development, debugging, documentation, and productivity.

Core Skills

React.js • JavaScript • Redux • Material UI • ASP.NET Core • .NET 6/.NET 8 • C# • REST APIs • Microservices • Ocelot API Gateway • SQL Server • PostgreSQL • Azure • Docker • GitHub Actions • Azure App Service • Azure SQL • Azure Storage • Azure API Gateway • ACR • ACI • Dapper • Jest • AI-Assisted Development • Prompt Engineering • ChatGPT • Claude • GitHub Copilot • NotebookLM

Professional Experience

American Tech Vision Solutions LLC | Senior Full Stack Developer

Mar 2024 – Apr 2026 | Hyderabad

Key Contributions:

- Owned end-to-end development across frontend, backend and deployments for enterprise applications.
- Designed and implemented REST APIs, authentication, onboarding, and KYC and account management modules.
- Built microservices using ASP.NET Core and Ocelot API Gateway.
- Integrated external banking APIs and implemented RSA-based encryption for secure data exchange.
- Deployed applications using Azure App Service, Azure SQL, Azure Storage, Azure API Gateway, ACR, ACI and Docker.
- Investigated production issues, supported releases, and participated in sprint planning, code reviews and architecture discussions.
- Mentored junior developers and collaborated with BA, QA, Java, Database and AI teams.

Bank In A Box

Digital banking platform enabling financial institutions to launch secure online and mobile banking services.

- Built backend APIs for authentication, onboarding, KYC and account management.
- Integrated external banking services with configurable API routing.
- Implemented RSA encryption for secure customer data handling.

Clinical Administration & Management System (CaMS)

Enterprise healthcare platform for patient registration, appointments, billing and clinical workflows.

- Owned backend development across major healthcare modules.
- Collaborated on React frontend implementation.
- Built microservices and deployed services on Azure.

Hiring & Applicant Tracking System (HaTS)

Recruitment platform for hiring lifecycle management.

- Developed React frontend, .NET APIs and email notification integration.
- Supported Azure deployments.

Asset Management System

Internal enterprise asset tracking platform.

- Developed backend services using .NET Core and Dapper.
- Deployed and supported services on Azure and IIS.

Xyram Software Solutions Pvt. Ltd. | Software Developer

Nov 2022 – Mar 2024 | Hyderabad

Key Contributions:

- Developed XyMACS procurement platform using React.js, .NET 6, PostgreSQL and microservices.
- Built Purchase Request, RFQ, and Purchase Order and User Management modules.
- Developed reusable UI components and REST APIs.

XyMACS (Procurement Platform)

- Developed key modules like purchase requests, RFQ, PO management, and user access control.
- Designed front-end components using Material-UI and Formik for seamless form handling.

ZF Wabco | Software Engineer

Mar 2022 – Oct 2022 | Bangalore

Key Contributions:

- Developed responsive frontend applications using React.js, Redux, Storybook and JavaScript for enterprise fleet management solutions.
- Built reusable UI components, integrated REST APIs, and implemented state management for scalable and maintainable applications.
- Collaborated with backend developers, QA teams, and business analysts to deliver new features and enhance application performance.
- Participated in sprint planning, code reviews, bug fixing, unit testing, and Agile Scrum ceremonies.
- Worked with Git for version control and contributed to deployment and release activities.

Driver Management System

Enterprise fleet management application for driver lifecycle management.

- Developed React.js modules for driver registration, profile management and access control.
- Built reusable UI components using React.js, Redux, Material UI and Storybook.

- Integrated frontend with REST APIs and wrote Jest unit tests.

Eco – Driver Performance Monitoring

Analytics platform for monitoring vehicle usage, fuel consumption and driver behavior.

- Developed dashboards and analytics screens using React.js.
- Integrated backend APIs and optimized dashboard performance.

Professional Development

Be10X – AI Career Accelerator Program (In Progress | Jul 2026 – Sep 2026)

- Learning Generative AI, Prompt Engineering, AI-assisted software development, and workflow automations through Agents.
- Building AI-powered solutions using ChatGPT, Claude, GitHub Copilot, NotebookLM, Cursor AI, Comet and other modern AI tools.
- Applying AI for software design, debugging, documentation, testing, and developer productivity.

Education

Bachelor of Technology (Computer Science & Engineering)
JNTUA University

Certification

UpGrad - Full Stack Development Bootcamp
